CONTACT LENS POLICIES AND PRICING

<p>CONTACT LENS FEES:</p> <p>These fees do not include:</p> <ul style="list-style-type: none"> • The refraction fee • The cost of a comprehensive eye exam • The cost of the contact lenses 	<p>NEW FIT:</p> <ul style="list-style-type: none"> • Price includes training and follow-ups • A yearly exam that entails problems or changes 	<p>ANNUAL CONTACT LENS EXAM:</p> <ul style="list-style-type: none"> • No issues or changes in lenses.
<u>CONTACT FIT TYPE:</u>		
Spherical Fit	\$80.00	\$60.00
Low Cylinder Toric Fit	\$90.00	\$70.00
<p>Specialty Fit</p> <ul style="list-style-type: none"> • Monovision • Bifocal • Multifocal • High Cylinder Soft Toric (-2.75 or higher) 	\$100.00	\$90.00
<u>WE DO NOT FIT HARD LENSES</u>		

All fit fees include two recheck visits of follow-up care at N/C. Additional follow-up visits are \$35.00 each. You have 45 days to return for the follow-up visit to finalize your contact prescription.

You will be provided a copy of your contact lens prescription and access to the prescription via the patient portal once the Doctor has released your for wear and finalized the prescription.

The above fees DO NOT include the cost of the contact lenses.

BY LAW, WE CAN NOT GIVE OUT CONTACT LENS PRESCRIPTIONS UNLESS WE HAVE SEEN THE PATIENT WITHIN THE LAST YEAR.

PAYMENT

Fees for the comprehensive exam, contact lens fitting, or annual contact lens checks are **due at the time of service**. Full payment is required for all contact lens orders, except trial lenses. If you want your lenses shipped to your home, you must pay in full before the lenses are ordered. When you are picking up from our office, any remaining balance must be paid before the contact lenses are dispensed.

Replacement contact lenses will only be dispensed when the original lenses are returned to our office. We accept cash, VISA, MASTERCARD, DISCOVER, and AMERICAN EXPRESS. After the initial fit, we will gladly order contact lenses over the phone with a credit card as long as the prescription is valid.

REFUNDS

There will be no refund on opened or marked boxes of lenses or colored lenses because of dissatisfaction with the color. If you are unhappy, any UNMARKED, UNOPENED, AND UNEXPIRED boxes of disposable soft contact lenses can be exchanged for up to 6 months from the order date, EXCEPT some Cooper Vision products. Some Cooper Vision products (including torics) in the same condition can only be exchanged for three months from the order date.

There will be NO refund of the exam, fitting, or annual contact lens check fees.

PATIENT PAPERWORK

Advancements in contact lens technology offer the potential of successful contact lens wear to most of our patients. A contact lens is a medical device in contact with the tissues of your eye; therefore, it must fit appropriately to maintain the health of your eyes. A contact lens prescription can only be determined by the careful observation of the lens on the eye and the eye's response to the lens on follow-up visits. Since follow-up care is essential, you must keep all appointments and follow all lens care instructions.

THE COMPREHENSIVE EYE EXAM

A complete medical and refractive eye examination is necessary before a patient can be fit with contact lenses. This exam is critical to assure the good health of your eyes and to rule out the possibility of any unsuspected, underlying condition that may prevent contact lens use.

CONTACT LENS FITTING

The goal of contact lens fitting is to find the most appropriate contact lens for each patient's optimal vision and comfort. An enormous variety of types, materials, sizes, and colors are available. We are committed to taking the time and effort to fit your contact lenses properly. Although many patients will need only one fitting session, sometimes this process requires several appointments. In our experience, the extra time, effort, and patience are well merited by both your ultimate satisfaction and the health of your eyes. All patients being fit into contacts for the first time must go through the fitting process. We will not finalize the contact lens prescription until both the patient and the doctor are satisfied with the fit and visual acuity of the contact lens. We will provide one set of trial lenses. If any additional lenses are necessary, there will be a fee of \$5.00 to cover the cost of the lens. Any patients who are changing lens brands must also have a new fitting. A contact lens fitting does not have to be performed on the day of the comprehensive or routine eye exam and can be performed in an additional appointment slot within 90 days FROM the initial eye exam.

CONTACT LENS TRAINING SESSION

The patient will be provided with personalized instructions concerning the safe care and usage of contact lenses. The first training will be up to 30 minutes long. If additional time is needed, it will be necessary to schedule a second 30-minute training session at a different time. Upon successful insertion and removal, the patient may begin wearing the contact lenses, and we will schedule the first follow-up appointment. (It is our experience that children learn these new skills more quickly without the parents in the room.)

FOLLOW-UP APPOINTMENTS

Follow-up appointments are necessary to ensure several things:

1. The contact lenses are fitting and moving well.
2. The prescription provides the best possible vision.
3. The eyes remain healthy.
4. There are no problems with insertion or removal.
5. The patient understands and complies with the recommended wearing schedule.

All fit fees include two recheck visits of follow-up care at N/C. Additional follow-up visits are \$35.00 each. You have 45 days to return for the follow-up visit to finalize your contact prescription.

ANNUAL CONTACT LENS CHECK

By law, a contact lens prescription is valid for only one year. All patients are required to come in for an annual contact lens exam. This is necessary to ensure that the patient's eyes are healthy, and the contact lenses are still fitting well. Contact lens prescriptions cannot be renewed without an annual exam. If we are seeing you for the first time, and you have had a contact lens prescription from another office, we must have a copy of that prescription before your exam in this office. Otherwise, we will consider it a new fit, which we may not have time to complete in your initial visit, and additional costs will apply.

CONTACT LENS CARE GUIDE

- Always make sure contact lenses are right side out before insertion. The edges should "roll up" at the lens profile. If the edges are flared slightly, the contact may be inside out. An inexpensive magnifier can be very helpful with this evaluation.
- Wear lenses for 4 hours on the first day and increase wear by 2 hours each day until a maximum of 12- 14 hours has been reached.
- After removing the contacts, clean them properly and place them in the contact lens case, using the new solution daily. Lenses should be stored for at least 4-6 hours for complete disinfection.
- Do not allow soft lenses to come in contact with water. Use the only solution that is compatible with soft contact lenses.
- Do not sleep in contacts.

Some ADAPTIVE SYMPTOMS are normal for the first couple of weeks. These symptoms include tearing the contact lens upon insertion or removal, mild sensitivity to light, a slight headache, foreign body sensation, dryness, and mild itching. These symptoms should clear up when all-day wear is achieved. ABNORMAL SYMPTOMS include persistent pain, burning and excessive tearing, redness that does not clear up, hazy vision that remains more than one hour after removal, and abnormal sensitivity to light. If these symptoms occur at any time, you should remove the lenses and call our office. (864-642-1889)

NOTE: Do not sleep in your lenses. If you fall asleep in your lenses, lubricate them well to loosen them before removal. Once the lens moves freely on the eye, it can be removed. If only minor discomfort or a dry feeling exists, you can resume normal wear in 24 hours. If abnormal symptoms exist, contact our office. (864-642-1889)

CLEANING SOLUTIONS AND REWETTING DROPS

- There are different cleaning solutions available. We will provide you with the best solution for your needs.
- REWETTING drops may be important for lubricating the eye and keeping the contact hydrated. To promote comfort, the lens must be well hydrated. REWETTING solutions also keep debris from building up under the contact lens. Frequency of REWETTING drop use varies from patient to patient. If you do a lot of close work, such as reading or working on a computer, you may experience more dryness because of the reduction in blinking. Certain medications such as antihistamines, diuretics, and birth control pills also contribute to dryness. Do not use an eye drop that is not specified for contact lens use.

REMEMBER:

Your compliance with the above is of the utmost importance to be successful with contact lens wear and to avoid any unnecessary trauma to the eye. Noncompliance with contact lens care can result in serious eye problems. Please contact Forrester Eye Associates with any questions or concerns about contact lenses at any time.
